/Kambiz Zand/ Supervisory Patent Examiner, Art Unit 2434			

Continuation of 11, does NOT place the application in condition for allowance because: The Applicant has argued that 'IT WEP is already set up, then the network is not a wireless network having a deactivated wireless network security.... To the orange, if WEP is set up, then the wireless network is one having activated wireless network security and, by using the already-set WEP key, the wireless client is accessing the network with authentication (Remarks p.q.) "!".

At the outset, the Examiner disagrees that having an "already set up WEP key" precludes Yamaguchi from anticipating the limitation "having a deactivated wireless network security." It appears the Applicant is equating the term "deactivated network security with a network that has never set up any network security. Dictionary com defines the term "deactivate" as "to cause to be indive, remove the effectiveness of: "The Examiner submits that whether the any network security has ever been set up is not claimed in the claim limitations, only that the wireless network curriently has a "deactivated wireless network security." According to the plain meaning of the term "deactivated" the Examiner believes Yamaguchi anticipates "having a deactivated wireless network security" and maintains finality.
